PROFESSIONAL SUMMARY

BICT (Hons) undergraduate at the University of Vavuniya with a strong interest in cybersecurity, software development, databases and UI/UX design. Enjoy building practical technology projects while learning how digital systems work and how they can be made more secure. Seeking internship and early-career opportunities where I can apply programming, problem-solving and communication skills in a professional environment.

EDUCATION

Bachelor of Information & Communication Technology (Honours)

Current

University of Vavuniya · Faculty of Technological Studies · Department of ICT

Relevant coursework: System Analysis & Design, Programming, Databases, Web Technologies, Software Development, Information Technology fundamentals.

- Developing practical knowledge through academic projects in AI, computer vision, C# applications and UI/UX design.

SKILLS

Technology	Hardware · Software · Front-End Development · Database · Cybersecurity
Development	HTML5 · CSS3 · JavaScript · C# · SQL
Design	UI/UX · Figma · Wireframing · Prototyping · Interface Design
Professional	Public Speaking · Presenting · Coordinating · Communication · Translation

PROJECTS

1. Hand Gesture Auto Scroller — AI / Computer Vision

Hands-free scrolling web application that uses hand gestures to control page scrolling, creating a more natural way to interact with digital content. Tools: AI, Computer Vision, JavaScript.

GitHub: github.com/prabhatsandakelum/hand-gesture-web-app.pdf-scroller.git

2. Sinhala AI Bot — Conversational AI

AI chatbot focused on conversational interaction and automated responses, designed to explore practical AI-based communication. Tools: AI, Chatbot, JavaScript.

GitHub: github.com/prabhatsandakelum/sinhala-ai-bot.git

3. Library Management System — C# / Database

C# based management system designed to organise library information and support common management activities through a structured database. Tools: C#, Database, Management System.

GitHub: github.com/prabhatsandakelum/c-Model-library-management-system.git

4. UI/UX Design Project — Figma

Figma-based interface design project focused on clean layouts, usability, visual hierarchy and user-centred design principles.

ACTIVITIES & SOFT SKILLS

- **Public Speaking** — Building confidence and clarity when communicating technical and general ideas to an audience.
- **Presenting** — Presenting project ideas and technical information in a simple and understandable way.
- **Coordinating** — Supporting planning, coordination and teamwork during academic activities and projects.
- **Communication** — Developing communication skills for technical teamwork and professional environments.

ADDITIONAL INFORMATION

- Portfolio website available (HTML, CSS & JavaScript) — links to all projects and downloadable CV.
- Comfortable with Git / GitHub for version control and collaboration.
- Strong learning mindset and interest in continuous improvement in cybersecurity and software engineering.
- Available for internships and professional opportunities.
